PROFILE

Analytical Data Engineer with 4+ years of experience working with large-scale financial and transactional datasets. Strong expertise in SQL and Python to analyze loan-level style data, build reconciliation frameworks, and generate client-ready reporting. Proven ability to translate complex datasets into actionable insights supporting performance, risk analysis, and data integrity initiatives.

TECHNICAL SKILLS

Languages: SQL (Advanced), Python (Pandas, NumPy), R (working knowledge), Java, Shell Scripting

Databases: Snowflake, SQL Server, MySQL, Oracle, Hive, IBM DB2

Platforms & Systems: Linux, Unix, Windows

Data Analytics & Financial Data Analysis: Loan-Level Data Analysis, Transaction-Level Analysis, Structured Datasets, Performance Metrics & KPI Development, Financial Reporting Analysis, Data Reconciliation, Data Validation, Risk & Trend Analysis, Root Cause Analysis

ETL & Data Processing: SQL-Based Transformations, Python Data Processing, Batch Pipelines, Data Cleansing, Data Standardization, Large Dataset Processing (Multi-Million Records)

Data Visualization & Reporting: Tableau, Excel (Advanced), Dashboard Development, Client-Facing Reporting, Custom Data Exports

Tools & DevOps: Git, Docker, CI/CD, Jupyter

Monitoring & Troubleshooting: Data Quality Checks, Log Analysis, Job Failure Analysis, Anomaly Detection

Cloud Platforms: AWS (S3, Glue, Redshift), Azure (Foundations)

WORK EXPERIENCE

Precisely Software Incorporated (Boston, Ma)

Data Engineer

Sep 2025 – Mar 2026

- Analyze and transform high-volume structured datasets (5M+ records weekly) using SQL and Python, ensuring accuracy and completeness across downstream reporting systems.
- Develop loan-level style validation and reconciliation frameworks to detect data inconsistencies, reducing reporting discrepancies by 22%.
- Lead classification and entity-mapping initiatives across 250K+ business records, improving data standardization and analytical reliability by 18%.
- Perform deep-dive transactional data analysis to identify anomalies, missing attributes, and structural inconsistencies, decreasing issue resolution time by 40%.
- Partner with engineering teams to productize analytical workflows, improving automation coverage by 35% and reducing manual intervention.
- Present findings and data-driven recommendations to internal stakeholders, supporting strategic decision-making.

Data Operation Intern

Jun 2024 – Dec 2024

- Wrote complex SQL queries in Snowflake to extract and analyze structured financial datasets exceeding 2M+ rows per reporting cycle.
- Automated recurring performance and segmentation reporting workflows, reducing manual reporting time by 60%.

- Built Tableau dashboards visualizing key performance metrics and transactional trends, improving business visibility into data by 25%.
- Generated customized analytical exports supporting client inquiries and RFP responses, improving turnaround time by 30%.

Gannon University (Erie, PA)

Data Analytics Coordinator

Sep 2022 – Sep 2024

- Designed SQL-backed reporting pipelines supporting 10K+ records annually, ensuring consistency and auditability of performance metrics.
- Standardized KPI definitions and implemented data governance practices that reduced reporting inconsistencies by 28%.
- Delivered detailed analytics presentations to leadership, translating complex datasets into actionable insights.

Research Analyst, Department of Engineering

Oct 2021 – Dec 2022

- Analyzed structured research datasets (100K+ records) using SQL and Python, performing detailed validation and anomaly detection at the transaction level.
- Built reproducible data pipelines that improved data integrity and reduced preparation time by 35%.
- Conducted deep-dive statistical and trend analyses to identify inconsistencies and ensure dataset accuracy prior to publication.
- Documented methodologies and validation logic to support auditability and long-term dataset reliability.

EDUCATION

Gannon University

Bachelor of Science in **Computer Science**

GPA: 3.86/4.0

Magna cum Laude

Awards & Certification

[AWS Certified Data Engineer Associate](#)

Jul 2025

[Microsoft Certified Azure Fundamental](#)

Aug 2025

Technical Interview Prep Course (Codepath.org)

Aug 2024

Extreme Network(Cisco)

Dec 2021
